What is ImpactHack?

Forget candlelit dinners: this Valentine's weekend, show some love to problems that matter. ImpactHack is a 24-hour, student-led global hackathon taking place on 13–14 February 2027 across the University of Bristol's Temple Quarter Enterprise and Mumbai Enterprise Campuses. We're bringing together over 300 student hackers to tackle real-world challenges using data science and AI. Expect big ideas, copious energy drinks, and a bouquet of roses for the winning team. Who said romance was dead?

What are the benefits of being a sponsor?

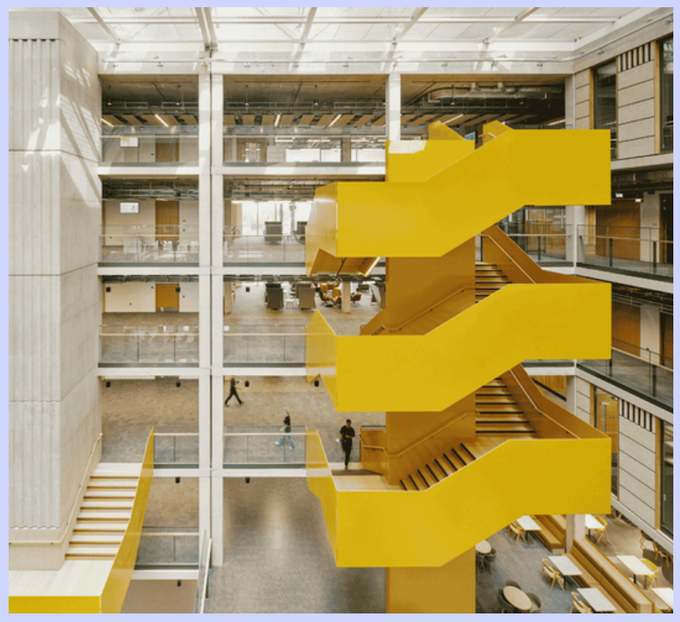

- **Promote your brand across two continents** in one weekend.
- **Meet talented students** in two cities for internships and graduate roles: Bristol, one of the UK's leading technology hubs, and Mumbai, India's financial capital.
- **Be part of one of Bristol's biggest ever hackathons**, and one of the first major events at the new Temple Quarter Enterprise Campus, a state-of-the-art space for students, startups, researchers and industry.
- **Put your tools and APIs in the hands of hundreds of builders** for 24 hours.

How you can sponsor ImpactHack

- **Direct financial sponsorship.** Allows us to spend your contribution where it is most needed, pooling it with other contributions to cover larger costs such as prizes, food and travel.
- **In-kind sponsorship.** Cover meals, snacks or drinks (e.g. "Breakfast brought to you by [Company]"), transport to the venue, or extra tools and credits for participants. You can also sponsor a non-monetary prize, such as software credits, a guaranteed interview or an office visit.

Our state-of-the-art Bristol venue

Our track record

ImpactHack might be our most ambitious hackathon yet, but it's far from our first. We've run several day hacks at the University of Bristol with around 100 participants each. We've also competed in plenty of hackathons ourselves, winning a few, and taken part in multi-city hacks like HackEurope. We know what works and what doesn't, but we also know we don't have all the answers. That's why we've partnered with some of the UK's leading hackathon organisers to make this a standout event for students across London, the South West and Mumbai. Check out some photos from our recent hackathons:
